

S71-S72 SERIES

STAINLESS STEEL PLATE CASTERS - HEAVY DUTY

Heavy duty stainless steel plate casters are available in 5", 6" and 8" diameters. All metal parts are stainless steel, making this caster highly resistant to conditions that can promote corrosion. Completely stainless wheel brakes and swivel lock options are available.

Stainless steel casters are designed to stop rusting and corrosion in wet and damp conditions, or in other corrosive environments. These casters lend themselves to use in applications such as food, dairy, meat packing plants, pharmaceutical houses and hospitals. Stainless steel is impervious to repeated washings, thereby reducing maintenance and providing long life to caster and equipment.
